JUST VIEWS: a Free & Open Monthly Video/ Discussion Program

Friday, Feb 9, 7:20 pm, 2007 --**Painful Deceptions concerning 9/11 Attacks**

Here's a documentary that pulls together many unsettling facts about the terrorism perpetrated within the USA on 9/11/2001 -- facts that were either not examined or not satisfactorily explained in the 9/11 Commission Report. For example: * Foreign governments gave US agencies warnings that attack was being planned then, yet US intercept planes did not perform even normally. * An extraordinarily high number of put options were placed on airline stocks just prior to the attacks, yet details as to by whom, why, and how much was made are missing. * The owner (Silverstein) of the *three* World Trade Center buildings that imploded that day admitted to giving the order to "pull" the third one -- and all came down as controlled demolitions do -- but none of this was probed. * The hole in the Pentagon was too small for a 747 to have made, the scant debris was incongruous, and civilian photos taken were confiscated -- Why the secrecy?

The producers point out that the only official investigation thus far was directed by Zulikow, an employee of the White House and a colleague of Condi Rice and was done quickly and cheaply, so good reason exists for an independent group to delve further. People of all shades of persuasion and skepticism are cordially invited to join the viewing and the civil dialogue following.
